Technical Support

Technical Support maintains support centers globally. All support services will be delivered in accordance with your support agreement and the then-current enterprise technical support policies. For information about our support offerings and how to contact Technical Support, visit our website:

<https://www.veritas.com/support>

You can manage your Veritas account information at the following URL:

<https://my.veritas.com>

If you have questions regarding an existing support agreement, please email the support agreement administration team for your region as follows:

Worldwide (except Japan)

CustomerCare@veritas.com

Japan

CustomerCare_Japan@veritas.com

Documentation feedback

Your feedback is important to us. Suggest improvements or report errors or omissions to the documentation. Include the document title, document version, chapter title, and section title of the text on which you are reporting. Send feedback to:

doc.feedback@veritas.com

You can also see documentation information or ask a question on the Veritas community site:

CloudPoint release notes

This document includes the following topics:

- [Software limitations](#)
- [Fixed issues](#)

Software limitations

Currently, the CloudPoint software has the following limitations:

- When you restore a snapshot, the **Rollback to a snapshot** option is only supported for storage array assets.
- The two **Restore to Copy** options (**Original, no overwrite**, and **New location**) are not supported for storage array assets.

Fixed issues

This release fixes the following issues. If you contact Veritas about one of these issues, refer to the incident number in parentheses.

- An issue was resolved that prevented logging in to CloudPoint. (3927810)
- CloudPoint can now protect multiple instances of Oracle on different servers that have the same application names and database names. For example, these instances may have been instantiated from the same virtual machine image. (3927965)
- CloudPoint now stores the product version number and patch level in a text file (`/cloudpoint/version`). When you communicate with Veritas about using CloudPoint, refer to this version number. (3927810)
- Long task names and task IDs are now displayed correctly on the user interface.

- When you modify a policy, the **Modify Policy** screen shows the current policy description and schedule. (3925852)
- You can now delete an agent from the **Agent Details** page. (3926837)
- On the **Host Details** page, the host snapshot count is now displayed correctly. (3926780)
- The **Recent Activity** icon now displays create and delete policy tasks. (3925913)
