Veritas Access appliance overview

This chapter includes the following topics:

- About this release
- About the Access Appliance software version
- About the Veritas Access Appliance

About this release

The *Veritas Access Appliance Release Notes* document is meant to act as a snapshot of information about a version of Access Appliance at the time of its release. Old information and any information that no longer applies to this release is removed from the release notes, and you can check old information in the previous Access Appliance documentation set.

Ensure that you review the *Veritas Access Appliance Release Notes* before you install and use the appliance.

See "Where to find the documentation" on page 9.

About the Access Appliance software version

The Access Appliance comes preinstalled with an ISO that contains the appliance operating system and all necessary software components, including the Access application. The appliance ISO version corresponds to the version of the Access software that it contains.

7.3.2 **Note:** The Access Appliance 7.3.2 ISO contains a slightly modified version of the Access application that is exclusive to the appliance. Access 7.3.2 is not available as a standalone software offering.	7.3.2

About the Veritas Access Appliance
Veritas Access is a software-defined Network Attached Storage (NAS) solution for unstructured data. Veritas Access appliances provide a simplified and high-performing solution for deploying an Access cluster in your data center. The goal is to provide a solution that eliminates the complexities that are traditionally associated with physical server deployments.

The appliances are rack-mounted servers that run the Veritas Optimized Operating System, a Linux-based operating system. The OS, the appliance software, and the Access application come preinstalled and optimized for the server hardware and disk storage units.

The following Access appliances are available:

- Veritas Access 3340 Appliance
  For a full description of the appliance hardware, refer to the *Veritas Access 3340 Appliance Product Description*
