

Technical Brief – Enterprise Vault 12.3

# **Retention Folder Enhancements**

#### **Retention Enhancements**

# **Feature Description**

Enterprise Vault 12.3 offers enhancements to the Retention Folder feature, whereby administrators now have the ability to specify translations for alternate languages to the retention folder names.

In this release retention folder capability is also extended to work with Internet Mail Archives.

#### **Business Value**

In previously releases, Enterprise Vault administrators would have to create multiple retention plans to cater for different languages in their offices around the world. This manual effort added to the administration overhead. The new feature reduces the configuration complexity and ongoing maintenance of the policies.

Retention folder capability were introduced to Exchange Archives in EV 12.2, in the 12.3 release the feature is extended for Internet Mail Archives. This feature will assist customers who use Microsoft O<sub>3</sub>65 to provide users with a pre-configured archive folder structure, and give end users a consistent experience in cases where customers are moving from Exchange On-Premise to Office 365.

# **Underlying Principles**

Retention folders are used by users to manually classify items by dragging them into preconfigured retention folders. Now in EV 12.3, administrators are able to use a single policy in the Vault Administration Console to roll out multiple languages with minimal effort.

#### **Guided Tour**

When creating a Retention Plan, multiple languages can now be selected (Figure 1).

Figure 1 – Retention folders can now be defined with multiple languages

# **Retention Enhancements**

Simply add the additional languages required (Figure 2).

Figure 2 - Add the additional languages required

Now specify for each language the translation (Figure 3).

## **Retention Enhancements**

Figure 4 – Example of French and English Retention folders in EV Search

Retention folder language and translations can also be provided via PowerShell (Figure 5).

```
OrgRetentionPlan - Notepad
<?xml version="1.0" encoding="utf-16" standalone="yes"?>
<RetentionFolderRoot>
  <Languages>
    <Language>da-DK</Language>
    <Language>fr-FR</Language>
  <RetentionFolder Name="Business" RetentionCategory="5 Years" Expiry="Folder" Inheritance="ThisFolderAndAllSul</pre>
    <Name lang="da-DK">Forretnings</Name>
    <Name lang="fr-FR">Entreprise</Name>
  </RetentionFolder>
  <RetentionFolder Name="Personal" RetentionCategory="2 Years" Expiry="Folder" Inheritance="ThisFolderAndAllSul</p>
    <Name lang="da-DK">Person</Name>
    <Name lang="fr-FR">Personnel%/Name>
  </RetentionFolder>
</RetentionFolderRoot>
```

# **Licensing and Support Considerations**

No additional licenses are required for retention folder translations and retention folders for Internet Mail Archives.
