Veritas CloudPoint[™] Quick Start Guide for Google Launcher

What is CloudPoint?

CloudPoint is a lightweight, snapshot-based data protection solution for public clouds and modern data centers. With Release 2.0, CloudPoint introduces important new data protection and orchestration capabilities needed by customers in the cloud and aligns closely with Veritas' multi-cloud data management strategy.

Veritas CloudPoint is purposely built for the data center and multi-cloud. It delivers:

- Native, multi-cloud data protection
- Streamline and automate snapshots
- Application consistent snapshots
- Faster recovery with finer controls
- Modular architecture for rapid workload integration

KEY FEATURES

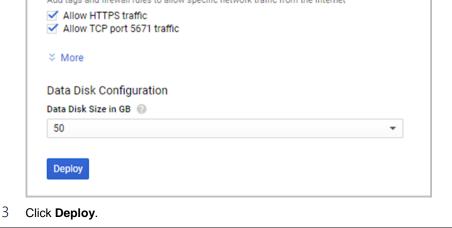

- . Snapshot-based data protection
- Automated scheduling and creation
- . Multi-cloud visibility and orchestration
- Auto-deletion of expired snapshots
- Fast RPO and RTO

0

- Deep integration with storage arrays, and public and private cloud platforms
- Modular architecture for rapid workload proliferation
- . Intuitive interface and reporting
- RESTful APIs for storage management and administration

Launch CloudPoint

ter your installation parameters	2 Verify installation			
Google Cloud Platform (GCP), navigate to the CloudPoint product page and click unch on Compute Engine.	1 On the installation verification page, verify your installation values. For detailed information, click More about the software .			
Complete the New Veritas CloudPoint deployment page. Note: CloudPoint is still installing in the background. After the verification				
Enter the deployment name and select the zone in which to run CloudPoint.	displayed, wait 3-5 minutes before you perform the next step.			
Use the default values for the boot disk and networking parameters.	× cloudpoint			
Select your data disk size. This disk will store the CloudPoint data.				
When you're done, the deployment page should look similar to the following:	Veritas CloudPoint™

Protect an asset

1 Create a protection policy

- 1 On the CloudPoint dashboard, in the **Administration** area, find **Policies**, and click **Manage**.
- $2 \quad \text{On the Policies page, click New Policy.}$
- 3 Complete the **New Policy** page.

Policy Information	Retention *
Policy Name *	😑 🛈 🕀 Copies Days Weeks Months Yeard
Description	Scheduling *
Storage Level * 500 characters	Mounty Daily Weekly Monthly
Application Consistent	
Enable Replication	

Enter the following: Policy Information

4

Policy Informa	tion
Policy Nam	e Enter lower case letters, numbers, and hyphens. The name should begin and end with a letter.
Description	Summarize what the snapshot does. (Optional)
Storage Lev	vel Select disk, host, or application. (An application snapshot requires the CloudPoint Enterprise license.)
Application	Consistent Whether you take an application consistent snapshot or a crash-consistent snapshot. An application-consistent snapshot is recommended for taking snapshots of database applications. (An application consistent snapshot requires the CloudPoint Enterprise license.)
Enable repl	ication Select this check box if you want to copy snapshots to another physical location for added protection.
Retention	Specify the number of snapshot versions to keep for each asset associated with this policy.
Scheduling	Select how often a snapshot is taken: hourly, daily, weekly, or monthly. Depending on your choice, also specify the time (by clicking the clock icon), the date, or the day of the week.
The following ex	xample creates a weekly disk level snapshot policy.

New Policy Retention * Policy Information 😑 🖞 🕀 Copies Days Policy Name * weekly_disk_snapshot Description Takes a disk-level snapshot each week Scheduling * Hourly Storage Level * disk Run at 12:00 AM 🕑 on... Enable Repli S M T W T E s Save Cancel Click Save.

2 Assign an asset to a policy

1

2

3

On the CloudPoint dashboard, in the **Environment** area, find the asset type you want to protect, and click **Manage**. This example protects an application.

On the Asset Management page, select the asset you want to protect.

On the Details page, click Policies.
