Technical Support

Technical Support maintains support centers globally. Technical Support's primary role is to respond to specific queries about product features and functionality. The Technical Support group also creates content for our online Knowledge Base. The Technical Support group works collaboratively with the other functional areas within the company to answer your questions in a timely fashion.

Our support offerings include the following:

- A range of support options that give you the flexibility to select the right amount of service for any size organization
- Telephone and Web-based support that provides rapid response and up-to-the-minute information
- Upgrade assurance that delivers software upgrade
- Global support purchased on a regional business hours or 24 hours a day, 7 days a week
- Premium service offerings that include Account Management Services

For information about our support offerings, you can visit our Web site at the following URL:

www.veritas.com/support

All support services will be delivered in accordance with your support agreement and the then-current enterprise technical support policy.

Contacting Technical Support

Customers with a current support agreement may access Technical Support information at the following URL:

www.veritas.com/support

Before contacting Technical Support, make sure you have satisfied the system requirements that are listed in your product documentation. Also, you should be at the computer on which the problem occurred, in case it is necessary to replicate the problem.

When you contact Technical Support, please have the following information available:

- Product release level
- Hardware information
- Available memory, disk space, and NIC information
- Operating system
- Version and patch level
- Network topology
- Router, gateway, and IP address information
- Problem description:

- Error messages and log files
- Troubleshooting that was performed before contacting Technical Support
- Recent software configuration changes and network changes

Licensing and registration

If your product requires registration or a license key, access our technical support Web page at the following URL:

www.veritas.com/support

Customer service

Customer service information is available at the following URL:

www.veritas.com/support

Customer Service is available to assist with non-technical questions, such as the following types of issues:

- Questions regarding product licensing or serialization
- Product registration updates, such as address or name changes
- General product information (features, language availability, local dealers)
- Latest information about product updates and upgrades
- Information about upgrade assurance and support contracts
- Advice about technical support options
- Nontechnical presales questions
- Issues that are related to CD-ROMs, DVDs, or manuals

Support agreement resources

If you want to contact us regarding an existing support agreement, please contact the support agreement administration team for your region as follows:

Getting started with Veritas Risk Advisor

What's included

This guide provides an overview of the software that is included in this release. It also explains how to obtain a product license and describes the method for installing Veritas Risk Advisor (VRA), formerly known as Disaster Recovery Advisor (DRA).

The following topics are included:

- [“Overview”](#) on page 8.
- [“Licensing”](#) on page 8.
- [“About this release”](#) on page 8.
- [“Supported platforms”](#) on page 9.
- [“Release contents”](#) on page 10.
- [“About installation”](#) on page 10.
- [“About the guides”](#) on page 10.

Overview

This document provides important information about Veritas Risk Advisor (VRA).

For the latest information on updates and software issues for this release, see the Late-Breaking News TechNote:

https://www.veritas.com/support/en_US/article.000037525

Licensing

VRA is a licensed product. Your VRA license controls the number of hosts that you can scan and is perpetual. VRA comes with a 14-day trial period.

For information on activating your VRA license, see the *Veritas Risk Advisor User's Guide*.

About this release

VRA is a data protection risk assessment solution that lets you diagnose disaster recovery problems (also called gaps) and optimize data protection. VRA enables enterprises to effectively manage business continuity implementations to ensure that critical business data is protected. VRA automatically detects and alerts you to any potential gaps, best practice violations, or Service Level Agreement (SLA) breaches.

VRA is an agentless enterprise discovery and monitoring tool that automatically scans your infrastructure and detects gaps and infrastructure vulnerabilities in your Disaster Recovery implementation.

VRA gathers information about your environment and does the following:

- Provides automated insight into your data replication environment to create an online, detailed, and up-to-date disaster recovery topology
- Automatically detects and analyzes gaps and unprotected production areas using a signature knowledge base of over 5,000 signatures
- Discovers the current data protection status of your critical applications and compares it to the state needed to comply with Disaster Recovery SLAs

VRA uses this information to provide the following:

- Detailed recommendations on how you can improve your environment, based on best practices and recovery objectives.
- Detailed lists and information about current data protection and disaster recovery risks and the prioritized actions for fixing them. VRA also provides a variety of tools that let you drill down and analyze your environment using detailed tables and topology maps. You can use this information to fix the problems that VRA detects.
- Auditing and compliance documentation, including a map of your production environment, disaster recovery configuration, and dependencies.

Supported platforms

VRA runs on Windows Server 2012 R2 or Windows Server 2008 R2 Standard Edition 64-bit. VRA requires administrator rights on the VRA application server.

Table 1-1 Servers that VRA can scan

Server	Operating system version	Processor architecture
AIX	4 and later	POWER3 series and later
HP-UX	11 and later	PA8700/8800/8900, IA64, IA64 Dual Core Montecito
Linux Red Hat/SUSE	Red Hat Advanced Server, SUSE	Intel EM64T, AMD Opteron
Solaris	8 and later	UltraSPARC II/III/IV/T1/T2/T2+, SPARC64-V/ VI / VII series
Solaris x64	8 and later	Intel EM64T, AMD Opteron
Windows	Windows Server XP Windows Server 2000 Windows Server 2003 Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 R2	Intel EM64T, AMD Opteron
ESX, ESXi	3.5 and later	

For detailed information about supported hardware and software, and the other entities VRA can scan, see *Veritas Risk Advisor Support Requirements*.

Release contents

The following table lists the contents of this release.

Table 1-2 Files included in this release

Directory or File	Contents
copyright	Copyright statement
VRA_7.3.3.exe	VRA executable file

About installation

The VRA installation wizard leads you step-by-step through the process of installing or upgrading to this release of VRA.

Before you install, be sure to read the following:

- *Veritas Risk Advisor Release Notes*
- *Veritas Risk Advisor Deployment Guide*
- “Installing or upgrading VRA” chapter of the *Veritas Risk Advisor User’s Guide*

About the guides

Product guides are in Adobe Portable Document Format (PDF) and located on Veritas Services and Operations Readiness Tools website at:
