Note: You have not selected the latest product version. Consider installing or upgrading to the latest version; otherwise, you may encounter issues that have already been fixed. To run a new report for the latest product version, select it from the Veritas product drop-down list.

System requirements

[Back to top](#)

Required number of CPUs: 1

Required memory: 256 MB

Required disk space:

Partitions	Minimum space required	Maximum space required	Recommended space
/opt	353 MB	642 MB	608 MB
/root	6 MB	6 MB	6 MB
/usr	16 MB	16 MB	16 MB
/var	1 MB	1 MB	1 MB

Supported architectures:

AMD Opteron architecture [1][2]

Intel EM64T architecture [1][2]

1. Supports Solaris 10, 64 bit only.

2. Check Oracle's HCL for specific models: <http://www.oracle.com/webfolder/technetwork/hcl/index.html>.

▼ Host bus adapter (HBA) parameters and switch parameters

[Back to top](#)

Unless otherwise stated, the specified Veritas product supports all HBAs (except iSCSI HBAs) and fibre channel switches supported by the platform and storage array manufacturers listed in the hardware compatibility list (HCL). For more details, click the link to the [HCL](#).

▼ Operations Manager

[Back to top](#)

Veritas InfoScale Operations Manager gives you a single, centralized management console for the InfoScale products. You can use it to monitor, visualize, and manage storage and cluster resources, and generate reports about these components in the Management Server domain. It can also help administrators centrally manage diverse data center environments. This section lists the documents for Veritas InfoScale Operations Manager 8.0.2.
